UC Components, Inc. is pleased to announce the launch of their new, full-feature, company website.

**FOR IMMEDIATE RELEASE**

Morgan Hill, California, February, 2021 – UC Components, Inc. announces the completion and launch of their new full-feature website that greatly enhances the user experience.

The updated website not only improved the overall look and feel of the site; also added are a full-featured, more intuitive, product browsing and buying experience for the customer. The site includes enhanced technical specifications, interactive CAD drawings, downloadable CAD drawings, 2D sales prints, 3D models, and much more. In addition, the new site has been built with increased resources, improved navigation, and live chat capabilities.

UC's new website also includes more detailed information on the company itself, their history, the industries served, product offerings, RediVac® and other processes, certifications, and a brand-new company blog. Visit the new and improved website at [www.uccomponents.com](http://www.uccomponents.com).

“The new site makes navigation easier and dimensions clearer while adding 2D sales drawings that should make the procurement process more fluid from quotation to purchase. A visual approach has taken the UC site to the next level, whether you're a first-time user or seasoned customer. The new website coupled with our cleanroom expansion and upgrade, ISO 9001:2015 certification, increased production schedule, and aggressive addressing of the COVID-19 epidemic have all poised UC Components for anticipated growth in 2021 and beyond,” stated Rick Anderson, President of UC Components, Inc.

UC Components, Inc. is open Monday through Friday from 8:00am to 4:30pm PST. More information about the company, their services, capabilities, and the products they offer can be found on their website.

**About UC Components, Inc.**

UC Components, Inc. is a pioneer and innovator in vented screw manufacturing and has been the world leader in high vacuum hardware since 1974. Today, UC is one of the leading manufacturers of fastener and seal products for clean-critical environments of the 21st century,

with a focus on plated, coated, polished, cleaned, and vented screws for High and Ultra High Vacuum equipment.

UC's vented fasteners promote faster, more efficient pump-down of vacuum systems by providing a path through which trapped volumes of air can be evacuated from the vacuum chamber.

The UC Components, Inc. family of RediVac® products includes both inch and metric sizes of center and slot-vented screws, washers, and nuts. The RediVac® family also includes their cleaned and vacuum-baked O-rings which are manufactured from top quality fluoroelastomer materials and available in a wide range of standard AS568A inch-measure sizes. They also offer non-vented screws, nuts, and washers for through-holes in HV and UHV systems and other applications.

RediVac® means ready for vacuum service, now. The UC Components, Inc. RediVac® system ensures that every fastener and seal you order from them arrives ready to install immediately. This proprietary process reduces surface particulates and other contamination by utilizing a multi-stage cleaning, inspecting, and packaging process all done inside of this new top-of-the-line certified ISO Class 5 Cleanroom.
